DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

11/09/2025 PVKKIT POLYTECHNIC College ECE (A&B) I years students participated in a debate on Suicide Prevention. The debate focused on the importance of creating awareness about mental health, identifying warning signs, and providing support to those in need.

Some students spoke about the causes of suicide, such as stress, depression, and lack of communication. Others highlighted prevention techniques, like talking openly about problems, seeking help from teachers, parents, and counselors, and supporting friends who may be struggling. Through this debate, students learned that: Suicide is preventable. Sharing feelings and asking for help is a sign of strength. Everyone has a responsibility to support and care for each other. The debate helped students develop confidence, awareness, and empathy, encouraging them to spread a positive message of hope and support in society.
