

Dr. G. Ramya Participates in International Faculty Development Program on Graph Theory

Dr. G. Ramya, Associate Professor of Mathematics, Department of Humanities and Sciences, PVKK Institute of Technology, participated in the **Seven-Day Online International Faculty Development Program (FDP) on “Advancing Technology Through Graph Theory: Modern Applications and Innovations (ATGT-2026)”** conducted from 6th May 2026 to 14th May 2026. The FDP was organized by the Department of Mathematics, SRM Institute of Science and Technology, bringing together academicians, researchers, and faculty members from various institutions to explore recent developments and applications of Graph Theory.

The program focused on the role of Graph Theory in emerging technologies, modern computational methods, and interdisciplinary research applications. Through expert lectures and academic discussions, participants gained valuable insights into innovative approaches and contemporary advancements in the field. Dr. Ramya's participation reflects her commitment to continuous professional development, academic excellence, and strengthening her expertise in Mathematics, thereby contributing to the enhancement of teaching, research, and knowledge-sharing within the Department of Humanities and Sciences.
