

Dr. N. Anjulatha Publishes Textbook on Nanoscience and Nanotechnology

Dr. N. Anjulatha, Associate Professor of Physics, Department of Humanities and Sciences, PVKK Institute of Technology, has successfully published a textbook titled “**Nanoscience and Nanotechnology**” in collaboration with Dr. Sandeep Kumar Shukla, S. V. G. V. A. Prasad, and Dr. M. Revathi. The publication is a significant contribution to the field of nanoscience and serves as a valuable academic resource for students, researchers, and faculty members. The book comprehensively covers the fundamental concepts, principles, and emerging applications of nanotechnology, making it highly beneficial for higher education and research.

This achievement reflects Dr. Anjulatha’s dedication to academic excellence, research, and knowledge dissemination. The publication not only strengthens the research profile of the Department of Humanities and Sciences but also enhances the academic reputation of the institution. The department congratulates Dr. Anjulatha on this remarkable accomplishment and appreciates her continued efforts in contributing to scientific education and innovation.
